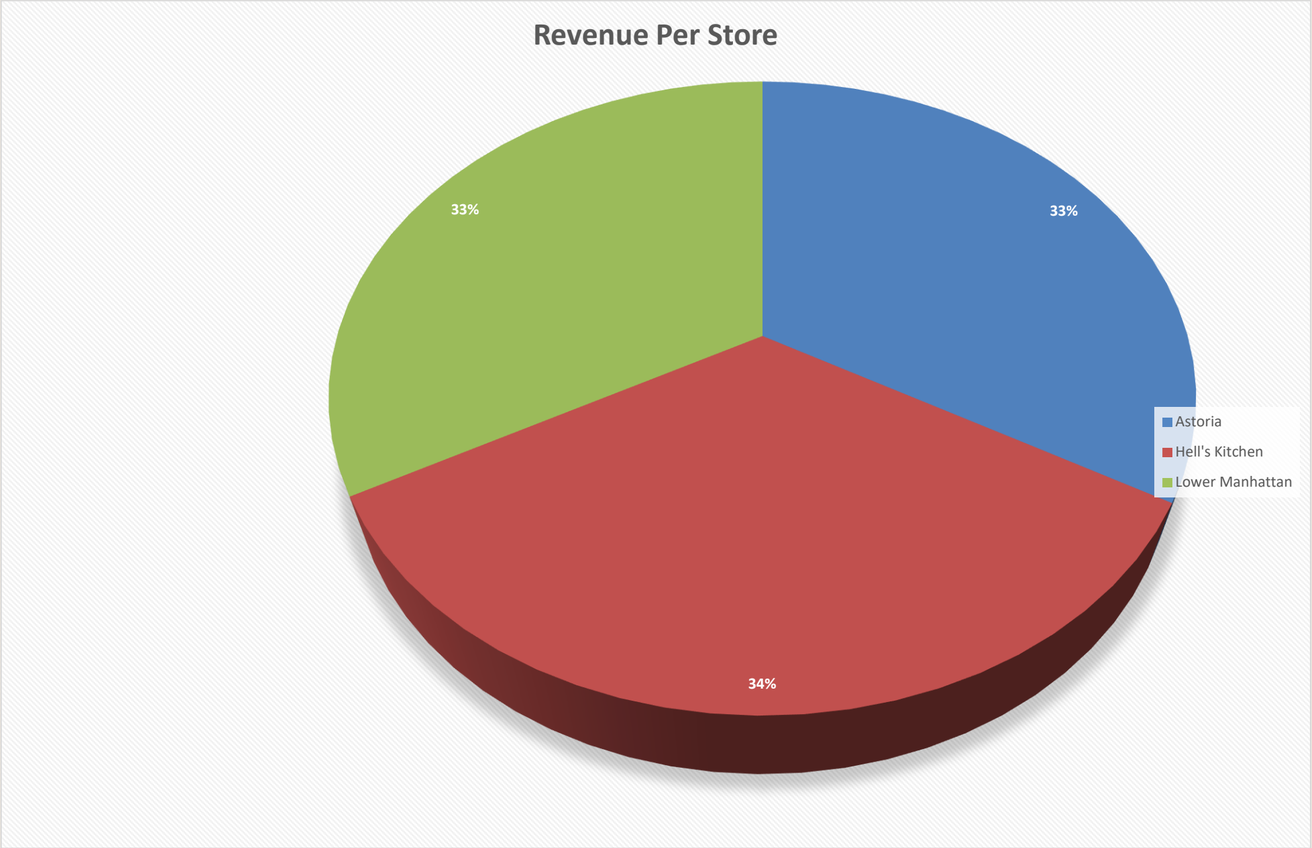
Group Bright Coffee Shop

presentation report to assist the CEO in decision-making

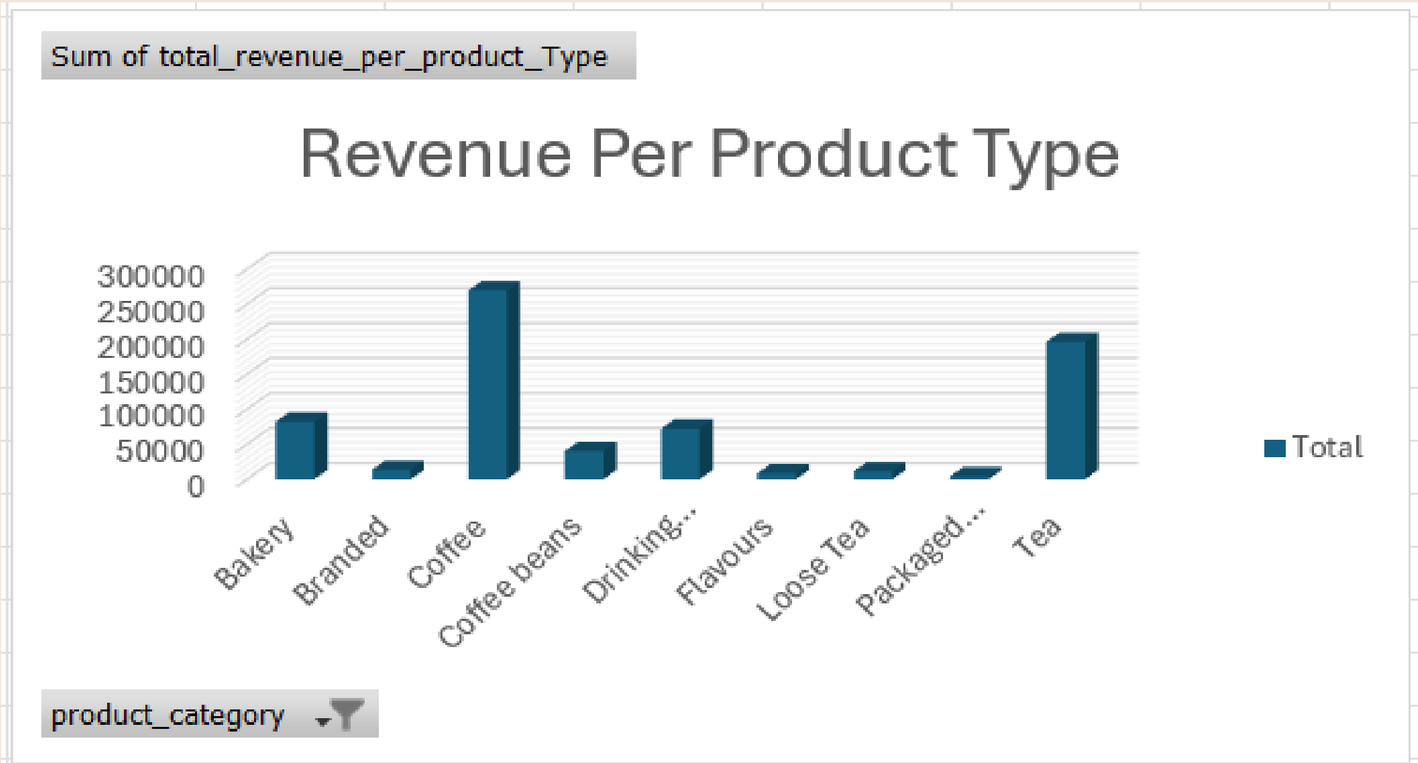
INDEX

- Analysis Revenue per store
- Products that generates the most revenue
- Time of day that the stores performs best
- A week sales analysis
- Month that generates the most sales and revenue
- Products revenue over 6 months

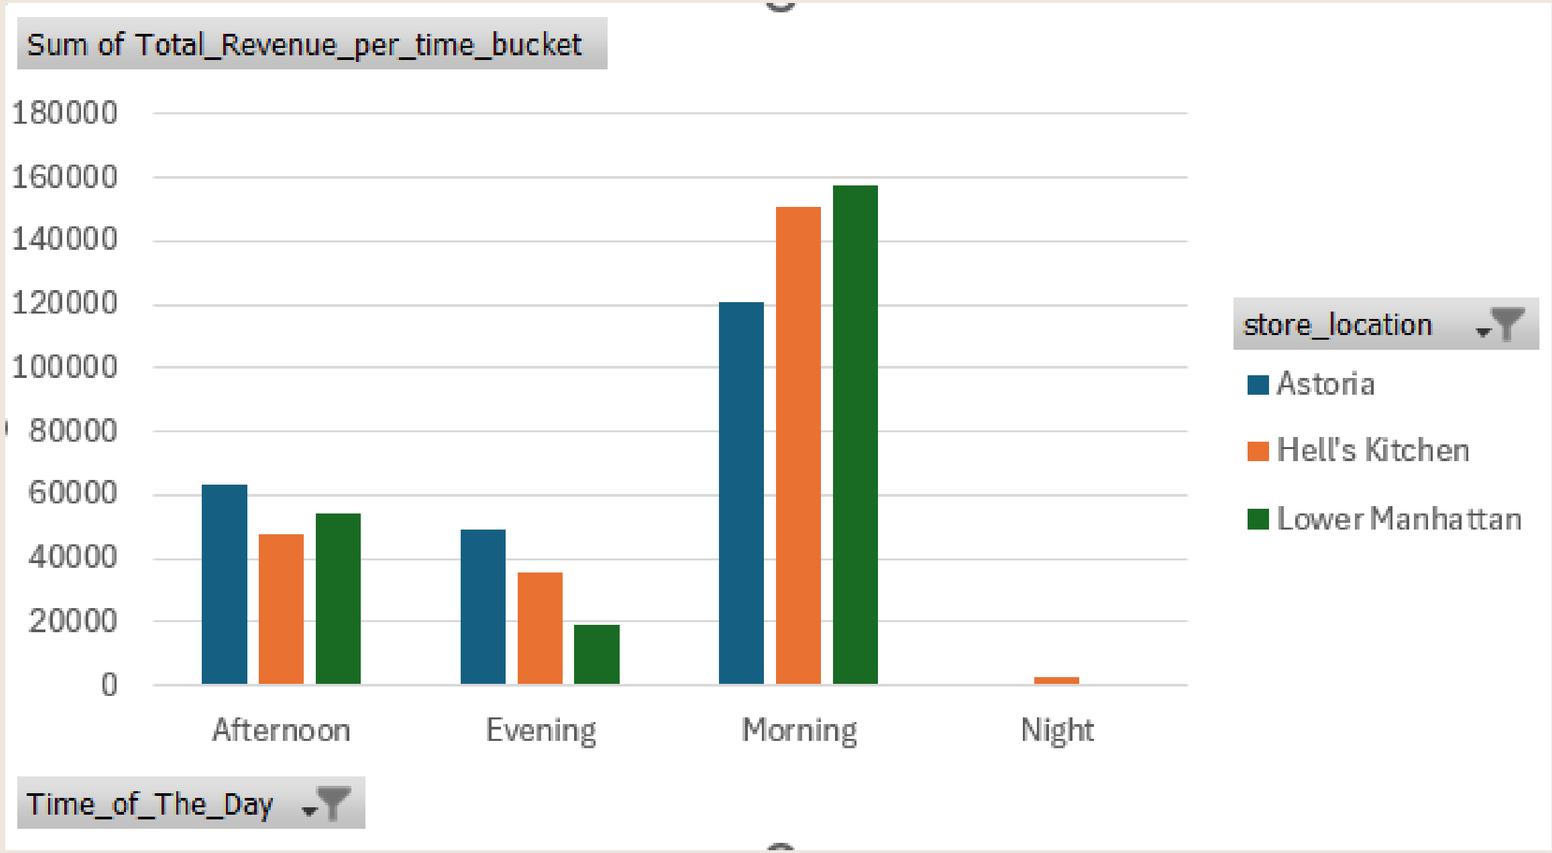
Hell's Kitchen is the best selling, and Lower Manhattan is the worse selling store by revenue and sales within the Group



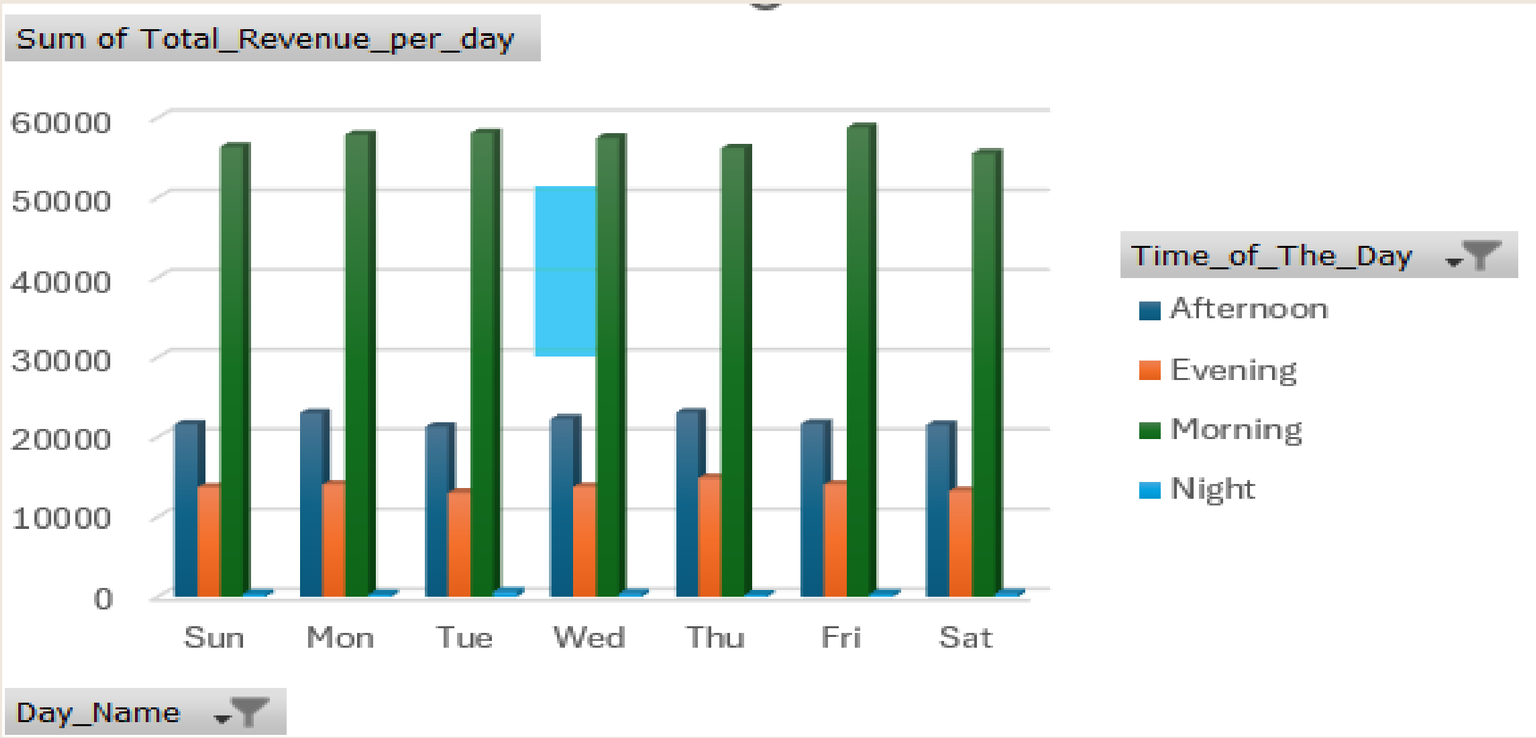
Coffee and Tea are the best-selling Products within the group and Packaged is the worst performing product



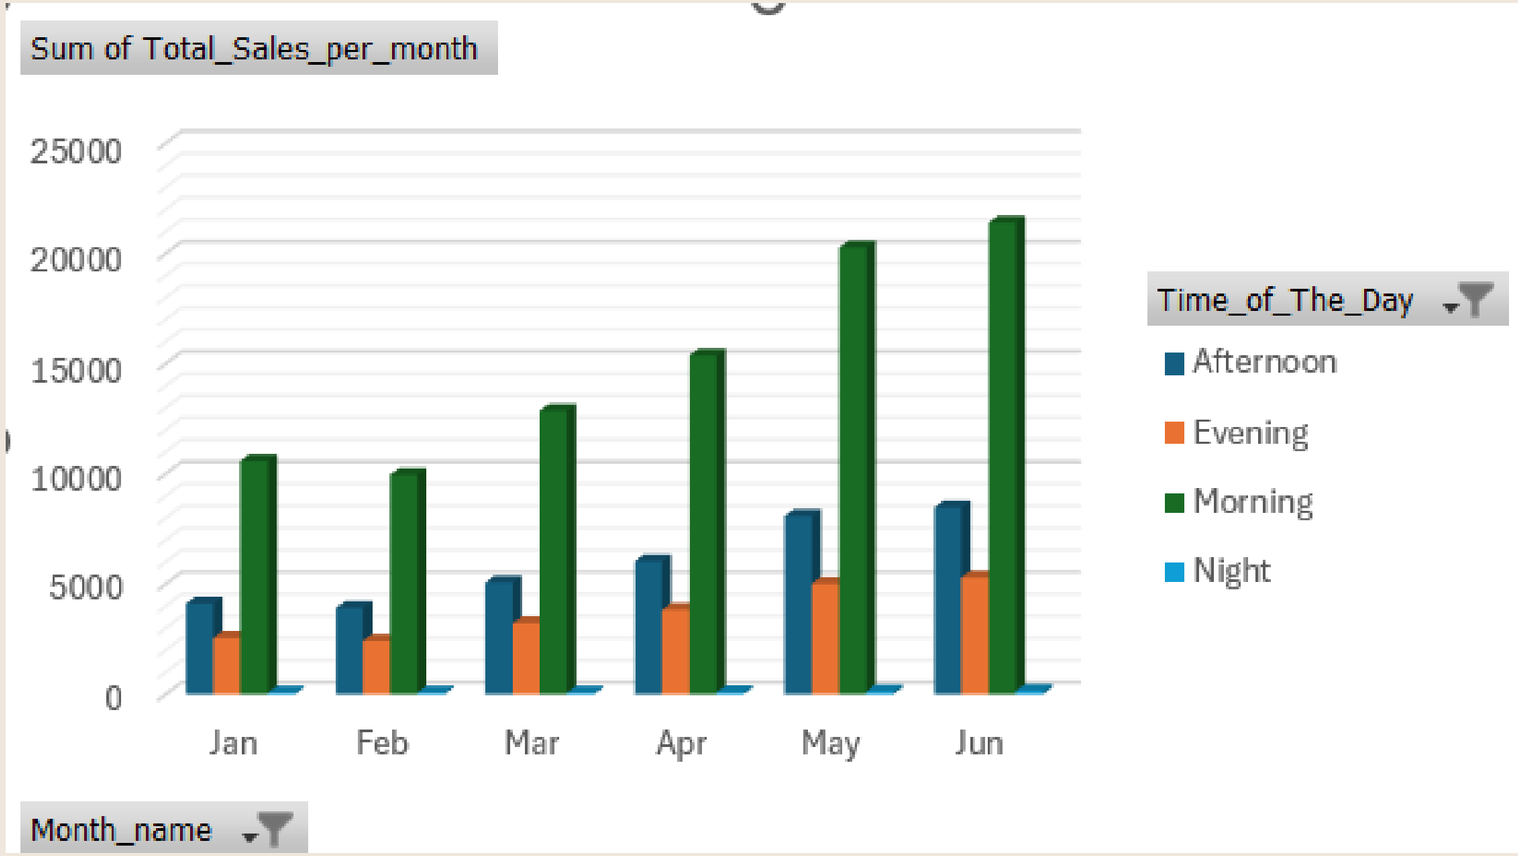
Time Bucket analysis shows that across 3 Shops the highest sales and revenue are in the morning and lowest at night



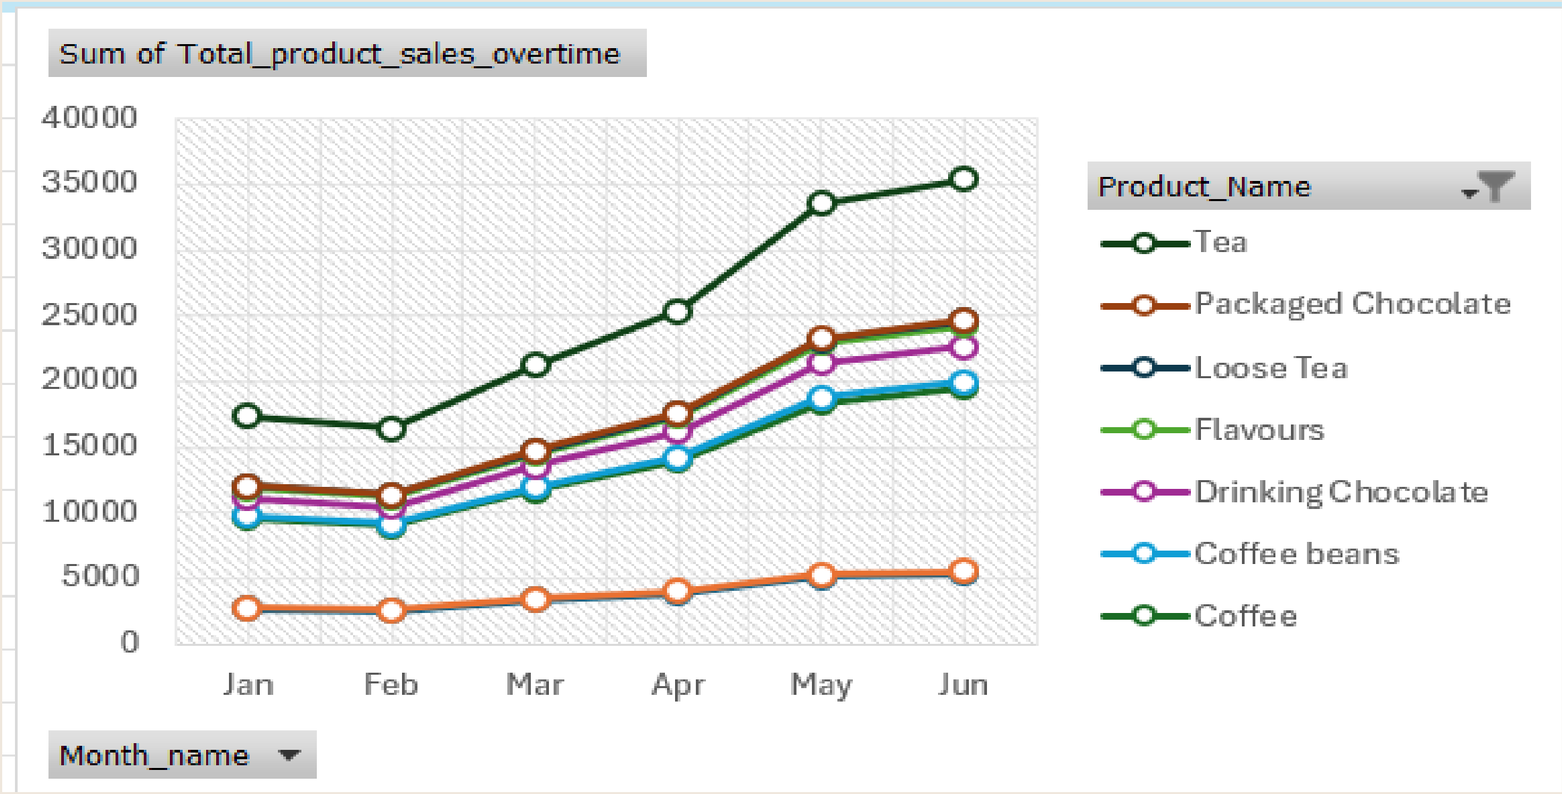
A week sales analysis across 3 shops shows that all 3 shops perform well in the morning s on all 5 days of the week and poorly perform at night on all 7 days of the week



The 6 months performance analysis shows that the sales starts to pick from April with the highest been June



The analysis shows that all the products the sales spike up from April, May and June. this is due to the hot beverage demand as the weather is starting to get colder.



Recommendations:

- The promotional specials at night
- Product bundling of poor performing product with best selling product
- Pricing optimization on the poor performing products
- Improve visibility & placement of the products
- Product improvement(recipe, portion size)
